DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-7, drawn to a workstation for producing a printed article using a transferable marking substance, classified in class 347, subclass 213.
- II. Claim 8, drawn to a retail system, classified in class 705, subclass 500.
- III. Claims 9-11, drawn to a retail kiosk, classified in class 902, subclass 30.
- IV. Claims 12-14, drawn to a heat dissipation element, classified in class 266, subclass 109.
- V. Claims 15-20, drawn to a transfer printing fixture, classified in class 347, subclass 103.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, IV, and V are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed

because the workstation does not require a heat dissipation element nor a transfer printing fixture as claimed. The subcombination has separate utility such as dissipating heat in any heat producing apparatus and transfer printing in any other printing apparatus that uses the transfer technique.

3. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as producing a printed article using a transferable marking substance and does not require a retail kiosk nor to be used in a retail system. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
